# WORKING CHARACTERISTICS

## Time Controller Optional Choice :

Optional 1. When Light sensed dark, then it will on, 4 hours later will dim to 30% of whole power.

When Light sensed daytime, then it will off.

Optional 2. Smart Dimming Solar Light

1) When light sensed dark, then it will on 4 hours.

2) Then it will work 6 hours 30% or 50%.

3) Then 70% till Light sensed daytime. Then Off .

Optional 3. Anytime you want it light on , any hours you want it last . And any percentage you want it work of whole power .

Notice : If not special demand , we all produce Optional 1 for all customers.

## PIR Sensor Optional Choice:

When Light sensed dark, then it will on, When Light sensed daytime, then it will off. When a person approaches the light, the light is 100% bright. After the person leaves for 120s, the brightness of the light becomes 20%.

# LUMINOUS INTENSITY DISTRIBUTION

## PROJECTS

By using our 10W Area Light to replace 30W Metal Halide bulb for parking area lighting fixtures, the customer is now able to save a lot per month from his electric bill.

Replace

10W LED = 30W MH

### Note:

- Don't take the LED lamp apart.
- The LED lamp must work under the right voltage according to the specification.
